

DESIGN, FABRICATION, AND INSTALLATION EXPERTISE AT YOUR FINGERTIPS

At Solico Metal, we aim to be the number one supplier of structural pallet racking, mezzanine, and steelwork products and services in Western Canada. Whatever your structural steel requirements, we are here to provide the solution. We manufacture the highest quality steel products, from simple connections to entire building frames.

Our structural steel specializations include steel galvanization, sandblasting, coatings, and custom steel finishes. Our team's experience, combined with the equipment and machinery, allows Solico to offer customers design and engineering support, exceptional customer service, consistent product quality, and on-time delivery.

CAPABILITIES INCLUDE:

- Structural Steel Wall Systems
- Structural Steel Roof Systems
- Architectural Features
- Steel Stairs
- Steel Railings
- Custom Plate Work
- Custom Fabrication
- Bending, Rolling, And Cutting
- Multi-Process Welding

From initial design to fabrication and installation, our all-in-one service offering gives customers a complete metalwork solution, whatever their project's needs.

We are committed to upholding the highest standards within our industry. All our welders and quality control inspectors and technicians are certified by the Canadian Welding Bureau (CWB). Solico has developed and implemented a structured and efficient quality management system and adheres to stringent standards.
