

STRUCTURAL PALLET RACK

Structural Pallet Racking is a more robust alternative to conventional pallet racking. Structural Pallet Racks are more resistant to forklift truck damage and are generally more durable when used in an external application. Our Structural Pallet Racks are manufactured according to your site dimensions, weight capacity requirements, and aesthetic preferences.

OPTIONS:

- Wire mesh deck, bar grating, or planking
- Pallet support bars
- Fitted or adjustable fork entry bars
- Back panel stops
- Guide Rail Systems
- Rack-supported buildings
